

# Getting Connected

## Day 1

Get connected with one another as a community and connect with nature. Do fun team challenges to learn about interdependence. Make new friends and build new skills.

## Astronomy

# Life Science

## Day 2

Hike at Spooner Lake stopping along the way for activities on wildlife and forest ecology, trail lunch, and nature journaling. Study life cycles, adaptation, and local species.

## Night Hike

# Earth Science

## Day 3

Learn about water quality and aquatic ecosystems aboard Tahoe research boat. Study Great Basin geology, see guest presenters, and choose a fun educational elective class.

## Songs & Skits

# Living Green

## Day 4

Commit to earth-friendly actions to reduce our ecological footprint and help protect our planet. Volunteer on conservation projects to keep Tahoe blue. Share our new knowledge.

## Take home what we learn

In **Great Basin Outdoor School's** typical four-day fall and spring programs, activities, lessons, songs, skits, and stories support each day's theme.
